

Bitcoin's Virtual Machine

LitVM is Bitcoin's Virtual Machine, officially endorsed by the Bitcoin Foundation.

LitVM Vision

LitVM is Bitcoin's Virtual Machine, enabling smart contract capabilities and Web3 applications for Bitcoin. Officially endorsed by the Bitcoin Foundation, LitVM is committed to fostering a 'hard money Web3' ecosystem, including Bitcoin yield opportunities, real-world assets, AI and more.

Powered by:

Our Mission

- Create more demand for LTC
- Unlock new use cases for LTC and Bitcoin-native assets
- Foster a utility-driven and cross-chain future for Bitcoin users
- Enable yield-generation opportunities for LTC holders
- Create a vibrant Bitcoin-powered yield, RWAs and AI-focused ecosystem

Evolving Bitcoin's Use Cases

Yield Markets

Unlocking Yield for LTC

- Bitcoin-focused DeFi ecosystem
- Proven institutional yield strategies
- Sustainable yield available to everyone

Bitcoin DeFi

Institutional Strategies

Exchange Traded Products

Real-World Assets

ZK-Secured Tokenized Assets

- L1-secured RWAs i.e. real estate, gold, silver
- Smart contracts enable fractional ownership
- DeFi-ready infrastructure

Tokenization

Oracles

Fractional Ownership

AI Ecosystem

AI Meets Hard Money

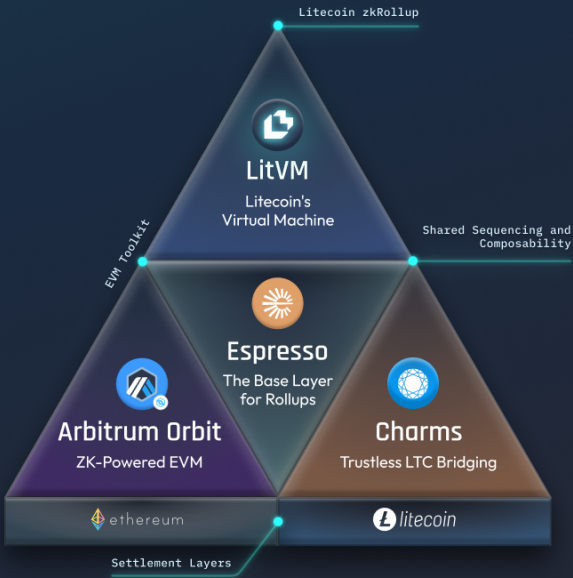

- Bitcoin-powered AI agents and models
- AI-enhanced Web3 applications
- Built for future-proofing in the age of AI

Bitcoin Agents

DeFi AI Agents

User-Friendly Web3

Strategic Partners & Supporters

Future-Proof Tech Stack

Powered by Arbitrum Orbit and Charms Protocol, LitVM delivers a decentralized programmable Web3 application layer on Bitcoin.

- Build:** EVM contracts via Arbitrum Orbit
- Prove:** Trustless Bitcoin bridging via Charms
- Bridge:** Bitcoin-native and EVM-native assets
